REALISTIC RAPTOR

Infrared RC dinosaur
YJ186236009

Woolington is a genus of ornithomimid dinosaur that lived approximately 75 to 71 million years ago during the late part of the Cretaceous Period. Two species are currently recognized, although others have been assigned to the genus. The type species is *V. mongoliensis*. Fossils of this species have been discovered in Mongolia. A model species is *V. mongoliensis* YJ186236009. It first appeared in issue 100 of the magazine.

Similar to other ornithomimid dinosaurs, Woolington is a bipedal dinosaur. It was a bipedal, quadrupedal dinosaur with long tail and an elongated neck. It is thought to have been used to scurry and run into trees. Woolington can be able to walk and run. It has a long tail with a long neck and can stand, with an elongated neck.

Woolington is currently observed in Yantai's view of the dinosaur garden. It is listed in the general public site to be promoted on the Jurassic Park website. It is listed in the general public site to be promoted on the Jurassic Park website. It is listed in the general public site to be promoted on the Jurassic Park website. It is listed in the general public site to be promoted on the Jurassic Park website.
